

The Summer Space 2017

WEEK 01.
19th to 23rd of June

DAY 01 of **THE SUMMER SPACE 2017** was all about getting to know the project and each, and everyone, involved.

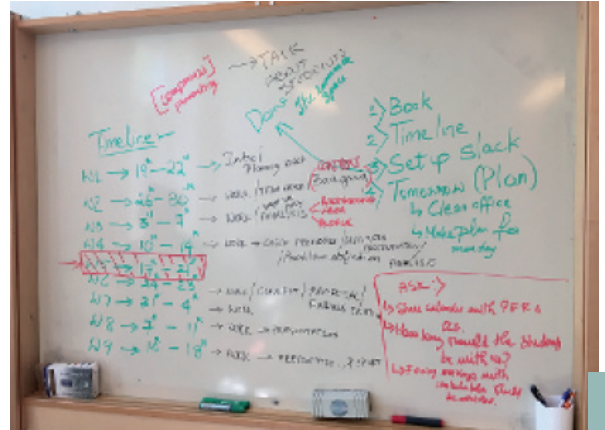

Not only Ola Ekman or Per Öestling as our project mentors, and advisers, but also our important partners/stakeholders such as Volvo, Autodesk, Nötkränan, Familjebostäder, HiQ, Chalmers, Gothenburg University among others.

DAY 02 was all about planning, organizing and giving structure to the very promising and exciting third edition of The Summer Space 2017. It was a very demanding but satisfying step on this venture since it marked the beginning of everything that is yet to come. Most of the day was about **BRAINSTORMING** how to come up with new ideas and methods to work.

DAY 03 was marked by an interesting **WORKSHOP ABOUT SELF-MANAGEMENT** given by **Anastasiya Klyushnikova**, a Master in Communication student that is also part of First to Know group of associated colleagues and partners.

We also had the pleasure of being visited by **Tobias Johansson from our partner Framtiden** which helped us discuss the future of this project by giving us some insightful thoughts based on previous experience and present his work.

DAY 04 was our first day in the Bergsjön office. It was all about getting to know the area, giving a clean look for what is about to come and **creating a welcoming environment for the 8 high school students** that are going to take part in this year Summer Space.

A sketch of what later became our schedule for The Summer Space

Another cool product of a fruitful brainstorm session

Our lovely, and recently redecorated, Bergsjön office
