

The Summer Space 2017

WEEK 02.
26th to 30th of June

DAY 01 of the second week was fully dedicated to the arrival and welcoming of the high school students that were selected to be part of the **The Summer Space 2017**. It started with a fun activity which main objective was to get to find out some personal facts about each other such as hobbies, interests and some more. After lunch we took the time to take a little **tour around Bergsjön** so that everyone could get a feeling about the area and also to get an idea about some other interesting aspects.

DAY 02 started with an informal presentation given by everyone involved in the project as a way of introduction. It was followed by an interesting workshop prepared by **Magnus Hallgärde**, one of our Master Students, about the **SWOT analysis** paired with a group exercise. The afternoon was marked by a team building activity as a way to energize the group before having the presentations of the exercise given before.

DAY 03 started with a meeting with one of our main partners, **Tobias Johansson from Framtiden**, with the purpose of giving us all an idea of the previous experiences regarding his collaboration with this project. The second part of the day was used for another workshop about "what are?" and the importance of **Stakeholders**. Right after that, an interactive activity took place that involved the sharing of the Master 's Students main skills and a brief set of suggestions about how everyone can benefit from them.

DAY 04 was opened with a workshop about **Scenario Planning** in which we took the students through the various processes related to the strategic thinking, and methods, that some organizations use to make long term decisions. This day was also of great importance for our project due to the presence of one of our partners from Göteborgs Stad, **Gitte Caous**, who's the head of this part of the municipality. In the same afternoon we proceeded with the continuation of the previous activity where we tried to match each others skills and divide them in terms of importance in relation to this project.

DAY 05 was all about giving cohesion and solidity to the ideas shared during the week as well as **evaluating and reviewing it** . We also took some time to plan for the next week and brainstorm about new possible activities.

Presentation time in the Summer Space

Outdoor energizing and team building activity

Discussion time and relaxing moment
